

Sustaining Our Towns Workshop Series

Solar Power Systems Explained

When- Wednesday 20th April 5.30pm – 7pm

Where – Eurobodalla Sustainable Devices –
15B Church St Moruya

This workshop, presented by Stuart Scobie, will provide those with little or no knowledge of Solar a basic understanding of how it works and the various ways in which it is used covering the following topics:

- How energy is created using solar panels.
- How is solar electricity generation different from solar hot water?
- How does generating renewable energy make us more sustainable?
- What is Grid Connect Solar?
- What is Stand Alone Solar?
- What do I need for camping/caravanning and Motorhomes?

RSVP Essential by Friday 15th April 5pm – Maximum 15 spaces available
